Joosr : A Joosr Guide to; The Rise of the Robots by Martin Ford: Technology and the Threat of Mass Unemployment before purchasing it in order to gauge whether or not it would be worth my time, and all praised A Joosr Guide to; The Rise of the Robots by Martin Ford: Technology and the Threat of Mass Unemployment:

1 of 1 people found the following review helpful. A "Guide" - A waste of time and moneyBy MichaelWould give a -0 stars if it were possible, Worse than a bad highschool book report. Waste of time and money especially for a "guide" to a very good book. DO NOT BUY THIS GUIDE - or anything else by them. Just sayin'.

In today's fast-paced world, it's tough to find the time to read. But with Joosr guides, you can get the key insights from bestselling non-fiction titles in less than 20 minutes. Whether you want to gain knowledge on the go or find the books you'll love, Joosr's brief and accessible eBook summaries fit into your life. Find out more at joosr.com. When we think of robots it seems more science fiction than science fact. But what kind of automated technology is entering the workforce today, and how will it affect job growth and availability in the future? Discover the very real dangers that robots present to not only service industry jobs, but white-collar jobs as well. The Rise of the Robots is a warning about advancing technology and how it will change the face of the workforce all around the world. Job creation today is primarily in the service sector, where robots are on the brink of taking over. And when automation moves into other industries too, where will people work and how will they support their families? And how would the possibility of mass unemployment affect the world. This book explores the automation problem and considers a possible government solution. You will learn:

- How robot technology could impact the service sector within the next decade
- Where automation is already imposing on jobs held by college-educated professionals
- Why robots pose a serious threat to the world economy, and what we could do about it.
