**From Routledge : Agricultural Protectionism in the Industrialized World (Routledge Revivals)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Agricultural Protectionism in the Industrialized World (Routledge Revivals):

Originally published in 1990, Agricultural Protectionism in the Industrialized World takes a detailed look into the

domestic and international agricultural policies of the United States, Europe, Canada, Japan, Australia and New Zealand. These areas are some of the most industrialised in the world and this study focuses on the benefits, policies and costs related to protectionism of their agriculture. These papers offer detailed analysis of the evolution, objections and domestic and international implications related to agriculture in specific countries as well as taking a global view of issues such as policy, trends and costs and concluding with a discussion on the effects of free trade. This title will be of interest to students of environmental studies.
