**Melinda Marshall, Tai Wingfield : Ambition in Black + White: The Feminist Narrative Revised (Center for Talent Innovation)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Ambition in Black + White: The Feminist Narrative Revised (Center for Talent Innovation):

1 of 1 people found the following review helpful. A Different Read at a Most Convenient Time By K. ElleI found this book to be inspiring and ground breaking. It gives voice to black women by recognizing the similarities, nuances and

challenges of the current feminist movement. It also articulates my own feelings, aspirations and motivations in a way that would be digestible for non people of color particularly executives. I will definitely recommend this book to upper management as a means stimulate dialogue.

What do women want? Black women and white aspire to excel, empower others, and earn well in their careers, but confront different hurdles in pursuit of these goals, as they have started the race from different gates. Progress for all women, we posit, depends on first recognizing their differences. In this book we show how history accounts for both the invisibility that keeps black women from attaining power as well as the ambivalence that constrains white women from pursuing it—offering strategies to help every woman fulfill her ambitions.
