**Sanjiv Gokhale, Thomas Gormley : Construction Management of Healthcare Projects (P/L Custom Scoring Survey)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Construction Management of Healthcare Projects (P/L Custom Scoring Survey):

1 of 1 people found the following review helpful. Good summary of a complex topicBy DavidsamThis book provides a very good summary of the complexities involved in healthcare construction as stated in the previous reviews. As a construction project manager and licensed architect looking to break into the health care construction field, I found this book to be a good starting point but only a starting point. Continued research into the AHCA, Joint Commission and NFPA99 are necessary to even begin to become versed in this complex topic.0 of 0 people found the following review helpful. Three StarsBy Ann ho nimousThe book by itself is good the content is not what i needed/expected0 of 0

people found the following review helpful. Five StarsBy RayGreat, Thanks

A complete, practical guide to managing healthcare facility construction projects Filled with best practices and the latest industry trends, *Construction Management of Healthcare Projects* describes the unique construction requirements of hospitals, including building components, specialized functions, codes, and regulations. Coverage includes: Regulations and codes impacting hospitals Planning and predesign Project budgeting Business planning and pro formas Healthcare project financing Traditional delivery methods for healthcare projects Modern project delivery methods and alternate approaches The challenges of additions and renovations Mechanical and electrical systems in hospitals Medical technology and information systems Safety and infection control Commissioning of healthcare projects Occupying the project The future of healthcare construction

About the AuthorSanjiv Gokhale, Ph.D., P.E., F. ASCE,, Professor of Civil Engineering, Department of Civil and Environmental Engineering, Vanderbilt University, has taught construction project management courses to undergraduate and graduate students since 2001. He is the recipient of the 2009 Distinguished Professor award by the Construction Industry Institute (CII) and received the Teaching Excellence award from the School of Engineering, Vanderbilt University, in 2005. Dr. Gokhale is coauthor of *Trenchless Technology: Pipeline and Utility Design, Construction, and Renewal* (McGraw-Hill Professional, 2005). Thomas C. Gormley, LEED-AP, Associate Professor and Director of the Commercial Construction Management program at Middle Tennessee State University, recently started teaching after nearly 40 years in hospital construction. He has worked as a contractor, an owner, and a program manager in the US, Europe and the Middle East. He is working on his dissertation for his PhD in Environmental Engineering at Vanderbilt University. For over 10 years, Mr. Gormley has served on the committee that writes the *Guidelines for the Design and Construction of Healthcare Facilities*the nationally recognized standard for hospitals. He is a Board member of the American Hospital Association's Certification Center and served on the committee that wrote the test for Certification of Health Care Constructors, which is a nationally recognized certification for builders.
