**S. Madon : e-Governance for Development: A Focus on Rural India (Technology, Work and Globalization)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised e-Governance for Development: A Focus on Rural India (Technology, Work and Globalization):

Over the past few decades, there has been a rapid proliferation of eGovernance for Development projects. Drawing on evidence from three longitudinal case studies of rural eGovernance projects this book shows that improving systems of governance is fundamentally a social rather than managerial or technological activity.

About the Author Shirin Madon has been researching the impact of ICTs on planning and administration in India for the last 15 years. At present, she is studying the development impact of a selection of e-governance projects in India. These projects relate to ICT usage for improving the administration and planning of rural development programmes: e-services applications; telecentre projects; and health information systems.
