**Samuel S. Kim : East Asia and Globalization (Asia in World Politics)** before purchasing it in order to gage whether or not it would be worth my time, and all praised East Asia and Globalization (Asia in World Politics):

This clear and timely book presents the first sustained and structured analysis of globalization in the East Asian context, exploring the strategies used by East Asian countries to cope with the forces of globalization. Eschewing both neoliberal OhyperglobalizationO chants and neorealist OglobaloneyO castigation, the authors integrate a broad conceptual framework with region- and country-specific case studies. Specifically, the book poses and addresses three major questions about East AsiaOs globalization. First, it identifies the range of contending conceptualizations of globalization that have underpinned the regionOs changing and contradictory views in the 1990s. Second, the book critically probes the discrepancy between promise and performance\_the myths and realities\_of East Asian

globalization and the complex interaction of challenges and responses. Third, the authors evaluate the impacts and consequences of globalization for East Asia's political, economic, social, cultural, ecological, and security development. These questions clarify the often-murky nature, challenges, responses, and consequences of globalization, especially in light of the Asian financial crisis and moves toward recovery.

This is a comprehensive theoretical and empirical study of globalization in the context of East Asia. The book provides an excellent guide for understanding the challenges and opportunities posed by globalization. It should be required reading for anyone who wishes to explore the key issues in East Asia and globalization. (*Journal Of Asian And African Studies*) About the Author Samuel S. Kim teaches in the Department of Political Science and is a senior research scholar at the Weatherhead East Asian Institute, Columbia University.
