Chinmay Pattnaik : Emerging Market Firms in the Global Economy: 15 (International Finance Review) before purchasing it in order to gage whether or not it would be worth my time, and all praised Emerging Market Firms in the Global Economy: 15 (International Finance Review):

The adoption of pro-market economic reforms by emerging market economies in last two decades has transformed the

institutional context for firms in these economies. The objective of this volume is to better understand how domestic and foreign firms have transformed their strategy, organization and management system in response to this change. Understanding of such transformation will provide implications to integrate contextual factors in theorizing about firm behaviour in emerging as well as developed economies. These studies will also assist practicing managers to comprehend various configurations of firm activities and complexities of competition in diverse institutional settings.
