Anthony H. Cordesman : Energy Developments in the Middle East before purchasing it in order to gage whether or not it would be worth my time, and all praised Energy Developments in the Middle East:

The Middle Eastern and North African region (MENA) dominates world energy exports today and will likely do so for decades to come, even if world consumers make steady progress in conservation, renewable energy sources, and

increases from gas, coal, and nuclear power. The MENA region, however, has been the scene of both internal crises and external conflicts. On several occasions, these crises have affected either the flow of MENA energy exports or the development of energy production and export capacity. The politics, economics, and social dynamics that shape threats to regional stability are complex. Cordesman details the factors behind these diverse forces and outlines current supply levels and future trends, taking each of these variables into consideration. The MENA area includes at least 22 states, with a combined population of nearly 300 million, each with different political, economic, demographic, and security conditions and needs. It is divided into at least four sub-regions including the Maghreb (Mauritania, Morocco, Algeria, Libya, and Tunisia); the Levant and the Arab-Israeli confrontation states (Egypt, Israel, Jordan, Lebanon, and Syria); the Gulf (Iran, Iraq, Kuwait, Bahrain, Qatar, Saudi Arabia, the UAE, and Oman); and the Red Sea states (Yemen, the Sudan, and Somalia). This important guide outlines the forces affecting each sub-region, including supply, demand, and financing, and forecasts the likely impact that different scenarios would have on energy resources under varying world conditions.

"This timely account of Middle Eastern energy and security trends is written by one of America's most respected strategic analysts....This volume will interest serious readers. Recommended. Public, academic, and professional library collections."-Choice?This timely account of Middle Eastern energy and security trends is written by one of America's most respected strategic analysts....This volume will interest serious readers. Recommended. Public, academic, and professional library collections.?-Choice?This work is a welcome contribution to the growing literature on energy and the Middle East. The volume is an historical, economic, and geopolitical analysis, laden with numerous charts and tables, of the hydrocarbon resources of the Middle East....[t]he book is a treasure trove of information and data, and a cogent analysis of the energy resources of the Middle East--a valuable tool for both students of energy and specialists in the oil and natural gas industry.?-Middle East Journal" This work is a welcome contribution to the growing literature on energy and the Middle East.
