Silvina P. Hillar : Mind Mapping with FreeMind before purchasing it in order to gage whether or not it would be worth my time, and all praised Mind Mapping with FreeMind:

4 of 4 people found the following review helpful. Good introduction to MindmappingBy Brian MaskellIs book is a tutorial on how to use FreeMind to create mindmaps. If you are a beginner to FreeMind, this would be helpful to get you started..0 of 1 people found the following review helpful. Five StarsBy wayne johnsonExcellent1 of 3 people found the following review helpful. Great material for visual thinkersBy Wojciech KorsakThis is very valuable material - easy to learn easy to follow.I'm happy, that mind mapping users can get supporting materials and learn, how to use it - to be more effective everyday.You can read my review on my blog:[...]good day happy mapping

The book is presented in easy to follow Cookbook recipes covering a wide variety of tasks and applications. The book is for users of FreeMind and FreePlane or new users who would like to explore the world of free mind mapping software. No previous experience is required.

About the Author
Silvina P. Hillar
Silvina P. Hillar is an Italian citizen who has been teaching English since 1993. She has always had a great interest in teaching, writing, and composition techniques and has done a lot of research on this subject. She has been exploring mind mapping and using it for more than 10 years in order to embed it into teaching. She is an English Teacher, a Certified Legal Translator (English/Spanish) and has a Post graduate Degree in Education (graduated with Honors). She has been working in several schools and institutions with native English speaking students, and as an independent consultant for many international companies in the capacity of an Interpreter, Translator, and Virtual Learning Environment (VLE) Course Designer. She has always had a passion for technological devices concerning education. Formerly, videos and cassettes were a must in her teaching lessons; the computer was, and still is, playing a big role. Her brother, Gaston C. Hillar, designed some programs and games for her teaching. Lately, she has been teaching using Moodle and Web 2.0. She believes that one of the most amazing challenges in education is bridging the gap between classic education and modern technologies. She has been doing a lot of research on multimedia assets that enhance teaching and learning through VLE platforms. She tries to embed the learning of students through new resources that are appealing and innovative for them. Thus, multimedia stimulates different thinking skills as well as multiple intelligences. She has authored two more books at Packt Publishing, which are Moodle 1.9: The English Teacher's Cookbook and Moodle 2.0 Multimedia Cookbook.
