**Rajneesh Narula : Multinational Investment and Economic Structure: Globalisation and Competitiveness (Routledge Studies in International Business and the World Economy)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Multinational Investment and Economic Structure: Globalisation and Competitiveness (Routledge Studies in International Business and the World Economy):

Multinational Investment and Economic Structure examines the relationship between industrial development and

foreign direct investment (FDI) activities, and the interaction between multinational (MNE) activity and economic structures. It deals with the changing structure of the world economy as a whole, and the dynamics of the relationship between industrial development and the extent of FDI activities across countries. It evaluates the concurrent (and interrelated) evolutionary processes behind economic growth and MNE activity and how these evolutionary forces impact on the economic structure of individual economies in the industrialised world as their economies converge through globalisation.
