**From Temple University Press : New Advances in the Study of Civic Voluntarism: Resources, Engagement, and Recruitment (Social Logic of Politics)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised New Advances in the Study of Civic Voluntarism: Resources, Engagement, and Recruitment (Social Logic of Politics):

Individuals who are civically active have three things in common: they have the capacity to do so, they want to, and they have been asked to participate. *New Advances in the Study of Civic Voluntarism* is dedicated to examining the continued influence of these factors—resources, engagement, and recruitment—on civic participation in the twenty-first century. The contributors to this volume examine recent social, political, technological, and intellectual changes to provide the newest research in the field. Topics range from race and religion to youth in the digital age, to illustrate the continued importance of understanding the role of the everyday citizen in a democratic society.
