L Alan Winters : Non-Tariff Barriers, Regionalism and Poverty:Essays in Applied International Trade Analysis (World Scientific Studies in International Economics) before purchasing it in order to gage whether or not it would be worth my time, and all praised Non-Tariff Barriers, Regionalism and Poverty:Essays in Applied

Non-Tariff Barriers, Regionalism and Poverty is a collection of key articles in three important areas of applied international trade research: measuring non-tariff barriers and their effects, the consequences of regional trading arrangements, especially on the countries excluded from them, and the connection between international trade and poverty. Drawing from 30 years of research and experience, L Alan Winters illustrates the development of techniques of this field and his continued commitment to answering real policy questions at the times at which they are debated. The collection shows the ways in which economic and econometric analysis can be used to answer real-world problems rigorously in the area of international trade and trade policy. Readers will find that some of the research included is of current methodological relevance and some of more historical significance. This volume is invaluable to anyone who is keen on developing their knowledge on trade policy, regionalism or poverty — three pressing issues in today's globalized world.

From the Inside Flap Non-Tariff Barriers, Regionalism and Poverty collects together some of the key articles in three important areas of applied international trade research: measuring non-tariff barriers and their effects, the consequences of regional trading arrangements, especially on the countries excluded from them, and the connection between international trade and poverty. Drawing from 30 years of research and experience, L Alan Winters illustrates the development of techniques of this field and his continued commitment to answering real policy questions at the times at which they are debated. The collection shows the ways in which economic and econometric analysis can be used to answer real-world problems rigorously in the area of international trade and trade policy. Readers will find that some of the research included is of current methodological relevance and some of more historical significance. This volume is invaluable to anyone who is keen on developing their knowledge on trade policy, regionalism or poverty three issues which are pressing ones in today's globalized world. About the Author L Alan Winters is Professor of Economics in the University of Sussex. He is a Research Fellow and former Programme Director for International Trade at the Centre for Economic Policy Research, London and a Fellow of IZA, Bonn. From 2008 to 2011, he was Chief Economist at the British government's Department for International Development (DFID), and from 2004 to 2007 Director of the Development Research Group of the World Bank. He has previously worked as Division Chief and Research Manager (1994 99) and Economist (1983 85) in the World Bank and in the Universities of Cambridge, Bristol, Bangor and Birmingham. He has been editor of the World Bank Economic Review, associate editor of the Economic Journal, and is now editor of The World Trade Review, and he serves on several other editorial boards. He is Chief Executive Officer of the Migrating Out of Poverty Research Programme Consortium (based in Sussex and funded by DFID), Chairman of the Board of the Global Development Network and a member of the Council of the UK's Economic and Social Research Council. He has also advised, inter alia, the OECD, the Commonwealth Secretariat, the European Commission, the European Parliament, UNCTAD, the WTO and the Inter-American Development Bank. He was made a Companion of the Most Honourable Order of the Bath in 2012.
