Roger Schroeder, M. Johnny Rungtusanatham, Susan Goldstein : Operations Management in the Supply Chain, 6th edition (McGraw-Hill/Irwin Series, Operations and Decision Sciences) before purchasing it in order to gage whether or not it would be worth my time, and all praised Operations Management in the Supply Chain, 6th edition (McGraw-Hill/Irwin Series, Operations and Decision Sciences):

1 of 1 people found the following review helpful. MISLEADING DESCRIPTION: Read very carefully.By Stephaniel feel deceived. I purchased this book for class, and what I received was A) not the same book pictured (although it has the same title and authors), and B) labeled as "Indian Edition." In looking more carefully at the description, I see that the seller mentions "Exactly the same as US edition." While this may be the case, it still seems a bit slimy to not be

more clear about what a customer will get instead. I would be fine receiving an Indian edition (especially at this great price), IF that were what was described and what I believed I had ordered. There are a few too many variables here, and I feel that this information is omitted intentionally to deceive shoppers. Shame on me for not reading the description more carefully. Shame on sellers for not being transparent. 1 of 1 people found the following review helpful. Finally, a well written modern textbook. By Materials Processes Engineer I used this book for a master's degree course and was please with how well the information was organized and presented. I've become critical of many textbooks due to their overuse of pictures and graphics while skimping on quality explanation. This book only uses graphics only as needed further support the text and covers each topic at an appropriate level. I'd consider this work an excellent entry point for anyone interested in supply chain operations. 0 of 0 people found the following review helpful. Good By CCI it's a textbook... all was as expected. I rented from and the book was in very good condition.

Operations Management in the Supply Chain: Decisions and Cases is an ideal book for the instructor seeking a short text with cases. This book employs a cross-functional perspective that emphasizes strategy and critical thinking, appealing to non-majors and practical for use in an MBA level or undergraduate course in operations management. The size and focus of the book also make the text attractive for the cross-functional curriculum where students are required to purchase more than one text. The sixteen cases offer variety in length and rigor; and several are from Ivey, Stanford, and Darden. This mix makes the book appropriate for both undergraduates and MBA students.

About the Author Susan Meyer Goldstein is Associate Professor in the Supply Chain and Operations Department at the Curtis L. Carlson School of Management, University of Minnesota. She earned a B.S. degree in Genetics and Cell Biology and an M.B.A. at the University of Minnesota and worked in the health care industry for several years. She later obtained a Ph.D. in operations management from Fisher College of Business at The Ohio State University. She has served on the faculty at the University of Minnesota since 1998 and was a Visiting Professor at the Olin Business School at Washington University in St. Louis for two years. Her current research investigates the link between service process design and process performance, and she is currently working with a Minnesota hospital that has been achieving one of the lowest heart attack mortality rates in the United States. She is also interested in issues related to aging service workers, operations strategy, and service quality. Her research has been published in Decision Sciences, Journal of Operations Management, and Production and Operations Management, among others. She is Associate Editor at Journal of Operations Management, Decision Science Journal, Quality Management Journal, and Service Industries Journal and serves on the editorial boards of many operations and service journals. She is the recipient of several research awards and research grants, and received the 2011 Carlson School of Management Teaching Award. Donaldson Chair in Operations Management at the Curtis L. Carlson School of Management, University of Minnesota. He is also the Co-Director of the Juran Center for Leadership in Quality and has earned an appointment as a Distinguished Teaching Professor. He received the B.S. degree in Industrial Engineering with high distinction from the University of Minnesota, MSIE University of Minnesota and Ph.D. from Northwestern University. Prior to joining the University of Minnesota, he taught at the U.S. Naval Postgraduate School, Monterey, California, and was an analyst for the office of the Assistant Secretary of Defense. Professor Schroeder has received research grants from the Ford Foundation, American Production and Inventory Control Society, Exxon Education Foundation and the National Science Foundation. He is a recipient of the Morse Award for outstanding teaching at the University of Minnesota. M. Johnny Rungtusanatham is Professor of Management Sciences at the Fisher College of Business, The Ohio State University. He has held faculty positions at the University of Minnesota Twin Cities, Arizona State University, and the University of Wisconsin Madison. He is an award-winning faculty member in both teaching and research, having been selected in 2000 to be the first recipient of the John Teets Outstanding Graduate Professor Award from the W. P. Carey School of Business and, in the same year, having received the distinction of Foreign Professor of High Qualification from the Universita di Padova, Italy. His co-authors and he also have won three best paper awards. His research has appeared in a number of prestigious academic and practitioner journals, including the Academy of Management, Decision Sciences, Journal of Operations Management, Production and Operations Management, and Sloan Management, among others. He is the Co-Department Editor, Operations Strategy Flexibility, Production and Operations Management and an Associate Editor for Decision Sciences, Journal of Operations Management, Journal of Business Logistics, and Journal of Supply Chain Management. He has served or is serving on the Board of Directors of the Decision Sciences Institute and the APICS Educational Research Foundation. While at Arizona State University, he founded and directed the W. P. Carey MBA Online Program. He has conducted research with, consulted with, and provided executive training for Arizona Public Services, Chevron Corporation, Deere Company, e-Bags.com, E-Source, Honeywell, Intel, LG Electronics, Medtronic, ON Semiconductor, Phelps Dodge, Seaquist Closures, United Technologies, and Zytac.
