Omar Dahi, Firat Demir : Southndash;South Trade and Finance in the Twenty-First Century: Rise of the South or a Second Great Divergence (Anthem Frontiers of Global Political Economy) before purchasing it in order to gage whether or not it would be worth my time, and all praised Southndash;South Trade and Finance in the

Twenty-First Century: Rise of the South or a Second Great Divergence (Anthem Frontiers of Global Political Economy):

The last two-three decades have seen a dramatic rise in South-South economic relations, yet no book exists that systematically examines these changes in the global economy. Most studies on South-South relations focus on regionalism, that is regional integration in South America, preferential trading agreements, or China-Africa relations. While studies/books on South-South trade existed in the 1970s and 1980s, the new round of South-South linkages has not been covered. In addition to filling this gap, this book also includes a historical, theoretical, and empirical examination that attempts to both place current South-South relations within their historical trajectory and examine in what ways current South-South relations differ from previous attempts (‘new-regionalism’), especially that most of the previous discussions took place under the Import Substitution Industrialization or relatively protectionist era. The book contains rigorous empirical analysis of trade and finance to uncover the developmental implications of South-South trade and finance. Finally, the book engages with the burgeoning ‘new-developmentalism’ to discuss how South-South economic integration and the rise of the South as an economic power and as an actor in multinational institutions both benefits and harms the developmental opportunities for poor and middle income South countries.

About the Author Omar S. Dahi is associate professor of economics at Hampshire College. Specializing in economic development and international trade, Dahi has published in various journals including Journal of Development Economics, Applied Economics, Southern Economic Journal, Middle East Report and Forced Migration .
