S. Adejumobi : State, Economy, and Society in Post-Military Nigeria before purchasing it in order to gage whether or not it would be worth my time, and all praised State, Economy, and Society in Post-Military Nigeria:

This book analyzes how neo-liberal state economic policies and political reforms have impacted on state-society relations, economic and class configurations, social composition of power, social welfare and cohesion in post-military Nigeria; and points to key policy recommendations that may be crucial in redirecting the future of the country.

"This is a finely conceptualized book with the potential to redefine the debate on democratic reforms and the nature of the state in arguably the most important country in sub-Saharan Africa: Nigeria. Said Adejumobi, himself a household name in Africanist political science, has assembled a formidable team of academics and scholar-activists. This volume will make an important addition to the emerging corpus on an important period in the political history of Nigeria." - Ebenezer Obadare, Assistant Professor of Sociology, the University of Kansas

"This collection is the first major study that is available on Nigeria after a period of prolonged military rule. It offers a comprehensive review of the country's uneasy quest to consolidate democratic governance at a time of far-reaching socio-economic change. Readers will find it to be an accessible reference material produced by some of the leading students of politics, economy, and society in contemporary Nigeria." - Adebayo Olukoshi, Director, UN African Institute for Economic Development and Planning

About the Author SAID ADEJUMOBI is the Chief of the Public Administration Section and Coordinator of the African Governance Report (AGR) at the United Nations Economic Commission for Africa (UNECA), Addis Ababa, Ethiopia.
