The book covers the vital issues that students will face including chapters on: preparing to study - which includes help on choosing a course, negotiating your study needs with family and friends, developing a study time table and organising your place of study; study management and learning - how we can choose the ways in which we learn using different strategies and resources depending on what we want to achieve; study skills - focussing on the key elements of studying: writing assignments; preparing for exams; learning online; working online and working in groups.
