**From Asian Development Bank : Tonga: Economic Update and Outlook 2012 (Pacific Studies)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Tonga: Economic Update and Outlook 2012 (Pacific Studies):

This economic report on Tonga is the result of a joint project of the Asian Development Bank (ADB) and the Australian Agency for International Development. It is part of ADB's Pacific Islands Economic Report series, which aims to assist governments in formulating policy by analyzing a country's economic and socioeconomic situation, key issues, and development prospects. The report provides a longitudinal study of the Tonga economy covering the last 2

decades.
