Carl Mosk : Trade and Migration in the Modern World (Routledge Studies in the Modern World Economy) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Trade and Migration in the Modern World (Routledge Studies in the Modern World Economy):

Revolutionized by the growing use of fossil fuels and electricity and the reduced costs of transportation and communications, international trade and migration has received an unprecedented boost in recent years. Using a theory of economic and political gravitation, backed up with both quantitative analysis and qualitative description, Mosk

argues that the tendency for trade and migration to flow together is tempered by market forces and political resistance to diversity in migration. This results in a glaring paradox: the political arenas of nation states are divided between embracing and opposing diversity in immigration, the same immigration flows their own policies helped create. A remarkable volume, this book will be invaluable to students of economics demographic historians, policy makers and political scientists.

About the Author Carl Mosk is Professor of Economics at the University of Victoria. He specializes in economic history, population economics and Asian economies, especially the Japanese economy. He is the author of a number of books on the demographic and economic history of Japan and is presently working on the economic history of the nation state.
