2 of 2 people found the following review helpful. Hard to read on a KindleBy InsiderThis is a VERY BASIC book on triangles. It could be OK for a beginner. It's seems meant as a "pitch" book for the author's Web site, and that's fine because there is modicum of decent content (which can be found anywhere). I would lower the rating but for the inexpensive price. It has a few big problems. The KINDLE is not a good medium for this sort of book, as the text refers to charts that require referring back to. It's hard to keep scrolling back and forth to connect the explanations to the charts. Perhaps a bigger problem is the small size of the charts. Even when enlarged, you can't see the "dates" the author is referring to relative to this or that price action. I finally just gave up trying. Another problem is that a huge amount of this very tiny book is nothing more than a recorded Q A session, which I did not find helpful. I would say this isn't really a "book" but rather perhaps "two chapters" of what would normally be called a book. I would say it's more like a two-part paper, part one being a basic explanation of triangles and part two a LONG Q A. I also found the author's discussion of precise entries to be vague given all the variables there are in real-world trading. Overall I was pretty disappointed, but I must say I'm an experienced trader and I do not believe I am the target for an intro "book" like this.

In late 2012, the charts of USD/GBP, Gold, the FTSE, the DAX and the DOW are all exhibiting triangle patterns. Breakouts from these patterns are imminent, which presents an unprecedented trading opportunity for the technical analyst - if you know how to spot triangles and trade them. In 'Trading Triangles' John Piper explains how and why triangles form, shows you how to spot a triangle on a price chart, and most importantly how to trade these patterns for profit. There are potentially massive moves on the way in these markets. 'Trading Triangles' is your vital guide to keeping on top of these moves and putting yourself in place to profit.
