**Rhys Jenkins : Transnational Corporations and Uneven Development (RLE International Business): The Internationalization of Capital and the Third World (Routledge Library Editions: International Business)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Transnational Corporations and Uneven Development (RLE International Business): The Internationalization of Capital and the

Third World (Routledge Library Editions: International Business):

Is the transnational corporation (TNC) an engine of growth capable of eliminating international economic inequalities or a major obstacle to development through a massive drain of surplus to advanced countries? This book presents five different perspectives on the role of TNCs: Neo-Classical, Global Reach, Neo-Imperialist, Neo-Fundamentalist, and Internationalization of capital. The author looks at their effect on local labour and capital, and considers the future prospects for TNC involvement in the Third World. The book provides an excellent comparative analysis of TNCs and will appeal to students in development studies and international economics.
