Bell, Arthur Ph.D. : Ultimate Speed Reading (Barron's Business Success Series) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Ultimate Speed Reading (Barron's Business Success Series):

2 of 2 people found the following review helpful. Great Book! By F. Sasso I have been finding myself constantly saying, "So many books, so little time" over and over. I read for pleasure and for learning. I also read the Bible for learning and devotionals. I am typically reading the Bible, scriptural and devotional; a novel, pleasure; and at least two educational books. It is a tremendous amount of reading! I tested my speed and I was at 287 WPM, with 78%

comprehension. I am never going to catch up! I began researching speed reading and some of the skills I already knew but wasn't applying regularly to my reading. I lacked structure. I needed to find a book that would teach me the points of speed reading, structure these points into a useable format, teach what types of speed reading for which types of reading, provide practice, and not bog me down with filler. I want just the facts. This book, Ultimate Speed Reading, ticked off every thing on my checklist and then some! This book is succinct, no fluff, just well structured lessons for speed reading. It lays out the main ideas by chapter and expounds upon each. It provides practice at the end of each chapter. I just finished reading the book in two days and my reading speed has climbed dramatically just from this first run through! I am so glad I found this book! I had no idea what books to read and just from reading the comments and synopsis I took a leap of faith. What a great choice! If you are reading this and want to improve your reading speed and comprehension by leaps and bounds this is a great book to learn with!

Reading with comprehension in school, at work, and for pleasure can be a plodding task or a brisk, energizing activity. This book shows readers how to increase their reading speed dramatically for professional, academic, and personal success. The authors offer proven ways to speed comprehension and ensure retention of even the most dry, difficult reading matter. They also teach special techniques for speed-reading all forms of e-messages and present many helpful exercises that increase readers' ability to concentrate. This is one of several titles in Barron's Business Success series—practical guides for career-minded men and women who are competing for advancement in the competitive business and corporate world.

About the Author Arthur A. Bell, Jr., P.E., is a registered professional engineer and certified mechanical, plumbing, fire, and energy conservation code official in the Commonwealth of Pennsylvania with more than 31 years of experience in the design of HVAC systems. In addition, he has been involved in the design of plumbing systems, fire protection systems, and construction field engineering-mechanical systems. Mr. Bell is also the author of "HVAC Design Portfolio", published by McGraw-Hill. W. Larsen Angel, P.E., LEED AP, is a registered professional engineer in the State of Maryland with more than 25 years of experience in the design of HVAC systems. In addition, he has been involved in the design of plumbing systems and electrical systems. Mr. Angel is also the author of "HVAC Design Sourcebook", published by McGraw-Hill.
